Software for creating smaller systems. The ML version does not support intelligent modules, but may be upgraded to LS, ST, Enterprise or Ultra version.

The version aimed at creating middle size IP video surveillance systems and to connect the variety of intelligent modules. Additional modules for the LS version are available at extra charge. The LS version may be upgraded to ST, Enterprise or Ultra version.

The ST version comes with the number of free intelligent modules. Face Mask Detection, Face Detection, Abandoned Object Detection, Tracking, Search for Objects included to the license price. Other Intelligent functions you can connect optionally. The ST version may be upgraded to Enterprise or Ultra version.

The Enterprise version comes with all additional features such as video wall, archive mirroring, backup drives and internal chat between operators, etc. Face Mask Detection, Face Detection, Abandoned Object Detection, Tracking, Search for Objects included. Other Intelligent functions you can connect optionally.

Ultra version includes all the functionality available in Eocortex. All the analytics are included into one license along with all additional features such as video wall, archive mirroring, backup drives and internal chat between operators, etc.
